presents:

e.headlights kit

Characteristics:

NEW TECHNOLOGY

Headlights are varnished with clear coat from the factory. Our e.headlights revarnishes the headlights using a innovative 3k system that brings them back to their original state for at least 3 years.

LONGER LASTING THAN THE COMPETITORS

Today the competitors use an abrasive system that destroys the original varnish. This results in a headlight that may look new for a while but over a period of time loses thier resistance making them replaceable.

PROFESSIONAL SYSTEM CERTIFIED BY RCAR

Following this presentation is the official analysis of e.headlights from RCAR and Cestar

QUICK TO USE, ECONOMICAL

Headlight does not need to be dismounted from the auto saving time and money Does not need to be polised after use.

Instructions for use:

Headlight does not need to be dismantled. Mask and sand headlight directly on auto if desired. Sand thoroughly- it is important to remove all the old varnish.

Clean headlight using a degreaser and antsilicone solution.

Prepare the solution all 3 components included in the kit.

Apply 2 coats waiting 30 seconds between coats. It is a overspray system. Dry with a IR lamp for 15 minutes.
